Technical Skills

- IoT, MQTT, Node-RED Dashboard
- Google Cloud Platform (GCP)
- C, C++, Python
- PHP, MySQL, SCSS, Django, Flask
- Git, R Programming
- 3D Printing, Laser Cutting

Education

National Central University, MS in Network Learning Technology (2023 – 2025)

National University of Kaohsiung, BS in Computer Science and Information Engineering (2018 – 2022)

Certifications

Language: English TOEIC Score: 735

Awards & Honors

National Level: Top 20, Taiwan Energy

Intercollegiate Level: Honorable Mention, 2022 Intelligent Automation Competition

University Level: 2nd Place, 9th Annual Student Creativity Competition

Department Level: Honorable Mention & Industry Award, Graduation Project Competition

Community Involvement

GDSC Technical Advisor, Google Developer Student Club

Speaker, Google Developer Festival Taipei: LLM Comparator with Google Vertex AI

Streaming Team, COSCUP Open Source Conference

Recording Team, SITCON Students' Information Technology Conference

Experience

Instructor, IoT Science Club, Guoguang Laboratory School

Instructor, IoT Maker Space, National University of Kaohsiung

Network Administrator, National Central University MEQA Lab

Projects

AirPocket - Portable Air Quality Monitoring Developed a compact air quality sensor integrating IoT and GIS. Uses MQTT and Bluetooth for real-time monitoring. Recognized with Honorable Mention and Sponsor Award.

Solar Shutter System Created an IoT-based solar shutter that adjusts the angle in real-time. Finalist in the Taiwan Energy Competition and 2nd Place in the Creative Ideas category.

Smartwatch with Linebot Integration Designed an interactive smartwatch integrating Linebot and Django. Features include heart rate, altitude, and temperature monitoring. Won Honorable Mention in the Digital Networking Competition.

GOGO Tea Ordering System Developed a web-based ordering system with a custom UI/UX. Utilized PHP, MySQL, and SCSS. Achieved top rank in department.
